## DDJ-FLX6-GT

€649 / \$649 / £569 including VAT

### OVERVIEW

#### SUMMARY

The DDJ-FLX6-GT is an updated 4-channel DJ controller that will replace the popular DDJ-FLX6. It features a fresh design for a new look and improved playability, and it's compatible with an expanded range of software. The new DJ controller adds support for VirtualDJ (license available separately), while retaining free compatibility with rekordbox and Serato DJ Pro. TRAKTOR PRO 3 will be available to use by downloading the mapping files (TSI file). The popular Merge FX feature is still there too, making it easy for DJs to transition between musical genres.

#### PRODUCT MOTIVATION

To provide a high-quality DJ controller for those who want to build on their performance skills and play different genres of music. Whether they want to practice at home or perform at events, on live-streams, or at friend's houses, the DDJ-FLX6 enables DJs to easily create pro-sounding mixes and scratch effects.

#### AUDIENCE

This unit is ideal for people who are new to DJing as well as those who have some experience in mixing but want to develop their skills and start performing.

### KEY MESSAGES

#### Updated design with a graphite color

The layout of the controls on the DDJ-FLX6-GT is the same as its predecessor, echoing a club-standard CDJ + DJM setup for intuitive performances. However, a new matte gray body and the graphite color of the jog wheels bring a sophisticated look.

#### Support for rekordbox, Serato, and VirtualDJ

VirtualDJ is compatible with the updated unit (license available separately), which also offers free use of the rekordbox Core plan and Serato DJ Pro. The DJ controller comes with license keys for the Serato FX Pack and Pitch 'n Time DJ Expansion Pack too. And the DDJ-FLX6-GT can be used with TRAKTOR PRO 3 by downloading the TSI file.

#### Full-size jog wheels with track position display

Pitch bending and scratching feel natural on the DDJ-FLX6-GT thanks to the large jog wheels, which are the same size as those on the flagship CDJ-3000 multi player. Each one features On Jog Display<sup>^</sup> too, perfect for keeping an eye on the playhead position, and the new rubberized finish on the outer ring gives you a much better feeling – especially when pitch bending.

#### Merge FX, Jog Cutter, and Sample Scratch<sup>^</sup>

These three innovative features make it easy for DJs to add drama to their sets and mix different styles of music, or create pro-sounding scratch effects.

<sup>^</sup>On Jog Display, Jog Cutter, Sample Scratch, Scratch Bank, and Plug and Play compatibility are not available in TRAKTOR PRO 3

### PRODUCT POSITIONING

The DDJ-FLX6-GT is a great controller for people who've experimented with DJing and want to take the next step towards performing.
